

Week 11 : Assignment 11

1) State True or False: Primary Zone-(Zone of direct impact) -Areas where project activities and facilities are located, including access routes, water and power supply networks, supply chains, and employee accommodation.

Answer :- True

2) The critical purpose of a comprehensive Baseline is

Answer :- Environmental and social impacts

Risk and opportunity

Determine eligibility for compensation and resettlement housing

Monitoring environment of RAP

Preparation of environmental and social management plans

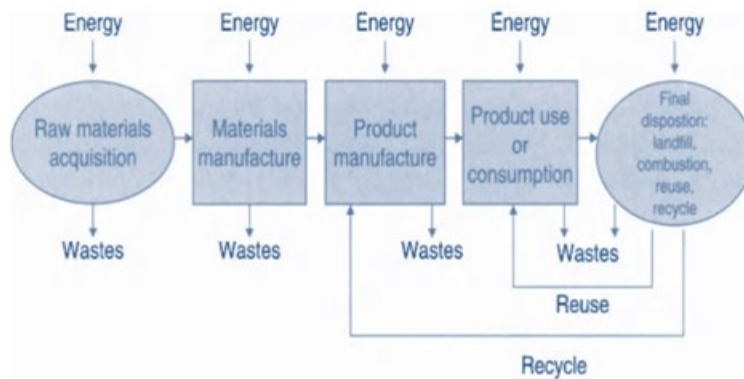

3) Life cycle assessment: Upstream impact means

Answer :- Where and how original materials are produced, processed, and manufactured

How they are packaged and manufactured

How they are used

4) State True or False: The image depicts a General Life cycle flow diagram

Answer :- True

5) State True or False: By Hazardous events we mean where humans or other species are exposed to a hazard at high levels and harm to humans or the environment in a very quick occurs very quickly.

Answer :- True

6) Steps for Risk Assessment are:

Answer :- Identify the hazard (Things that could go wrong)

Determine the likelihood that things will go wrong (including the nature and extent of uncertainties)

Determine the likelihood that things will go wrong (including the nature and extent of uncertainties)

Establish acceptability of Risk level- (compare to acceptability criteria)

7) State True or False: The Purpose of Cumulative Assessment (CIA) is to consider the incremental contribution of the project together with effects from other past, present, and reasonably foreseeable future activities

Answer :- True

8) State True or False: Inter-Project Effects: These effects occur between different environmental topics within the same proposal, as a result of that development's direct effects

Answer :- False

9) State True or False: As per the World Bank Operational Manual, an Environmental Management Plan (EMP) is the measures to be taken during the implementation, and operation of a project to eliminate or offset adverse environmental impacts, or to reduce them to acceptable levels

Answer :- True

10) State True or False: The Equator Principle provides a financial industry benchmark for determining ways to assess and manage social and environmental risk

Answer :- True
